English (Intermediate)

Summary

Full Stack Developer with over 3 years of practical experience in various technology stacks and industries. I have worked in both established companies and fast-paced startups, which has given me a great ability to quickly adapt to different business models and technical environments. I am passionate about technology, research, and continuous learning, as well as sharing knowledge with others. I am known for being highly adaptable, collaborative, and communicative. I enjoy working in dynamic teams and easily adapt to new technologies.

Experience

Aimo

05/2024 - Present

Full Stack Developer

Node NextJS React TypeScript MoleculerJS Redux GCP Mongo Ant Design Docker

At Aimo, I am responsible for creating services and building interfaces for Aimo's logistics, call center, tracking, and delivery platforms. The services and optimizations I build help automate processes from order taking to delivery to customers' homes.

Gigstack

01/2024 - 04/2024

Full Stack Developer Freelance

Node React TypeScript GCP Firebase Ant Design

At Gigstack, as a freelancer, I designed and implemented business logic and performed optimizations that automated administrative and financial processes for various businesses on the platform, including billing, payment collection, expense management, and connection with the SAT, improving operational efficiency and reducing manual tasks.

Destacame

02/2022 - 12/2023

Full Stack Developer

Django VueJS TypeScript Python AWS Lambda Amazon S3 Vuetify PostgreSQL
DynamoDB

At Destacame, I developed various products and services for Santander Bank. I was also responsible for improving and maintaining Destacame's various projects, as well as debugging, code refactoring, and process optimization.

Forma - Moov Media Group

04/2021 - 02/2022

FrontEnd Developer

React Angular Typescript NextJS Typescript VanillaJS MaterBase Selligent Webflow
MJML

At Forma, I was responsible for maintenance, interface construction, business logic for web platforms, and forms for companies in various industries. In addition, I helped send mass mailings using various tools.

Minsky

05/2021 - 08/2021

Full Stack Developer

Express Typescript NodeJS NextJS React ChakraUI GraphQL

At Minsky, my role was to build interfaces and put together the business logic for the various entities that worked with Minsky.

Devant

09/2020 - 12/2020

FrontEnd Developer

NodeJS TypeScript Angular Angular Material

At Devant, as a freelancer, I was responsible for implementing forms for the medication of cancer patients at the biotechnology company Roche.

Universidad de Ingeniería y Tecnología

02/2020 - 06/2020

Assistant Dean of Computer Science

LaTeX Pearl Linux

At UTEC, I worked alongside the dean of the Computer Science program. My responsibilities included communicating with the program's professors in order to update syllabus topics and grading systems, as well as updating the curriculum for the Computer Science and Data Science programs.

Krowdy

04/2018 - 07/2019

FrontEnd Developer

React Angular HTML5 Amazon S3 CSS3 TypeScript JavaScript emBlue HubSpot
Google Ad Manager Wordpress Wix

At Krowdy, my duties included creating landing pages with forms for various companies, updating and implementing new features on the Laborum platform, assisting with mass mailings, and uploading banners to their web platforms.

Projects

Elegimos.pe

JavaScript Python Django PostgreSQL HTML5 CSS3 UIKit

I was part of the Full Stack developers in charge of implementing the Elegimos platform in order to help Peruvian citizens vote for a governor in a conscious way thanks to the various Elegimos filters.

Blockchain Generator

C++ Typescript React Next Axios ChakraUI

I developed a Blockchain-based transactional platform that was responsible for managing sales records, withdrawals, and transfers.

Leauty Web Scraping

JavaScript Python Flask BeautifulSoup HTML5 CSS3 Bulma

I developed a platform that was in charge of obtaining data from Libgen with the help of web scraping in order to provide a better visual experience compared to Libgen.

Education

University of Engineering and Technology Careers

08/2018 - Present

in Computer Science

- CS1100 - Introduction to Computer Science
- CS2701 - Databases
- CS1D01 - Discrete Mathematics
- CS1102 - Object Oriented Programming
- CS2B01 - Platform-based development
- CS2100 - Algorithms and Data Structures
- CS2901 - Software Engineering

Volunteer

WAWA Laptop

Tech Coach

I was a coach and did tutorials for the App Inventor app creation workshops for girls from GIT, a Movistar program.

Hack Space Perú

Tech Coach

I taught web development workshops to 5th-grade students at the Telésforo Catacora school in Ate.

MakerLab PerúMakerLab

Tech Coach

I helped PUCP students with their pitch and solution proposals at the Real Plaza Hackathon.
